PROFESSIONAL SUMMARY

Well-qualified full stack developer with experience in a wide range of programming utilities and languages. Demonstrated expertise in both backend and frontend development, ensuring seamless integration throughout the entire process. Offering a solid background in software development, specializing in web application development and design using HTML, CSS, C#, JavaScript, and React. Proficient in developing and deploying complex backend systems, web services, and databases.

SKILLS

JavaScript, CSS, HTML, jQuery, Reactjs, Bootstrap5, TailwindCSS, React, Razor, C#, ASP.NET Core, .NET, ASP.NET MVC, SQL, RESTful API

EXPERIENCE

Kredo Inc.   01/2023 - Present
Full Stack Developer

• Developed, tested and implemented new components and data structures on existing applications
• Took ownership of several projects from conception to deployment
• Applied the SDLC principles and practices to projects in order to deliver the best user experience and meeting specific requirements
• Collaborated with graphics team to produce designs, images, and layouts for client-side applications
• Transitioned older application modules from C# Razor Pages to Reactjs
• Built RESTful APIs that served data to and from Reactjs front-end
• Contributed in peer code reviews, daily stand-ups, bi-weekly sprint planning, and bi-weekly retrospective
• Re-developed a shipping/packing software in order to improve workflow and production at the supply chain warehouse

Tekton Construction Technologies | Sabio   05/2022 - 01/2023
Full Stack Software Engineer

• Developed clean, readable code following common practices and development design patterns
• Championed test-driven development, ensuring consistent quality across all stages of the software development process.
• Designed and maintained relational databases, stored procedures and user defined tables using MS SQL Server Management Studio, while managing database resources to ensure satisfaction of unique data requirements
• Interacted with development team during the Software Development Life Cycle through peer planning sessions, code reviews, virtual pair programming, Sr Dev-Jr Dev interactions, and peer-peer testing

HealthTrust Workforce Solutions | Continental Supply Chain   04/2015 - 01/2023
Pharmacy Logistics Supervisor, Lead CPhT

• Worked with SMART application and Infor Warehouse Management System application
• Managed the day-to-day activities and workload of the Implant Department
• Supervised the Pharmacy Department team and trained new hires
• Created training manuals, best practices, policies and instruction guides for the team to adhere to
• Managed team workflow and department operations
• Researched and implemented changes to improve shipping, packing, receiving, and processing operations
